B. The list “Search across...”

In addition to the items in the *Inquiry Options*.

Find all words This is the default setting for unlogged users. This option will use the Boolean operator “AND” searching for resources that contain all words but not necessarily used together.

Find any of the words This option will do the search using the Boolean operator “OR” which means that at least one of several words in a query will be found in a resource.

Find the phrase This option will search for those resources that contain specific words in a specific order. It is similar with searching words in quotes (“”)

Find exact match This option lists only the resources that match the query term 100%. It will not list results in which the query terms are only part of a larger title, subject etc.

Find best match This will list the results in the order of the exact match, the phrase, all words or any of the words.

C. Filters

The screenshot shows the search interface with the following elements highlighted by red boxes:

- Search bar: "Căutare expresie generală ... introdu" with a search icon and "Căutare avansată" dropdown.
- Filters row: "Caută toate cuvintele (SI)", "Doar exemplarele disponibile" (checkbox), "Documente" (checkbox), "Caută doar în căutarea curentă" (checkbox), and "Include resurse virtuale" (checkbox).

Filtering results:

Available copies only (Doar exemplarele disponibile) Limits results to the items available in the library leaving out those copies that are on loan, missing, reserved etc.

Attachments (Documente) in addition to a standard search, this option will also perform a search within the electronic documents attached to the library registered items.

Only search in the previous search results (Căutare numai în rezultatele curente) Refine a search applying the advanced search filters to the results of your previous search.

Include Non-Physical Items (Include resurse virtuale) If this option is not checked, the search will exclude websites etc.

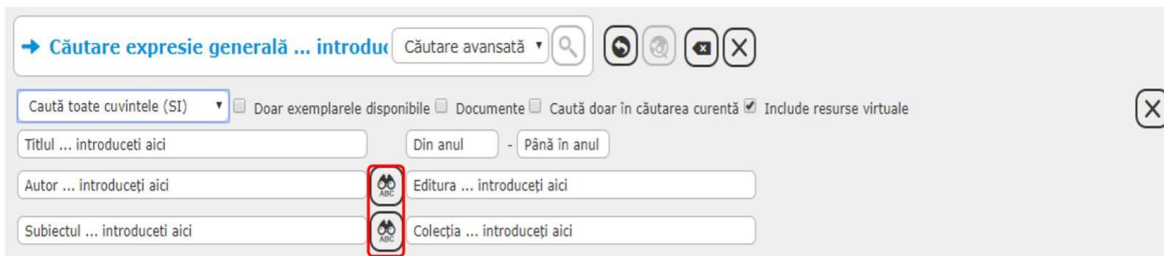

Year From (Din anul... Până în anul) This option limits the search for a certain time interval related to the publishing date

Types (Tipuri bibliografice) Every resource type is listed here. The default setting to "All" ("Toate") does not limit the search to a certain type of resource.

Branch (Filiala) All library branches are listed here. The search may also be performed in all branches. A parameter may set the default search to be limited to the branch commonly frequented by the user.

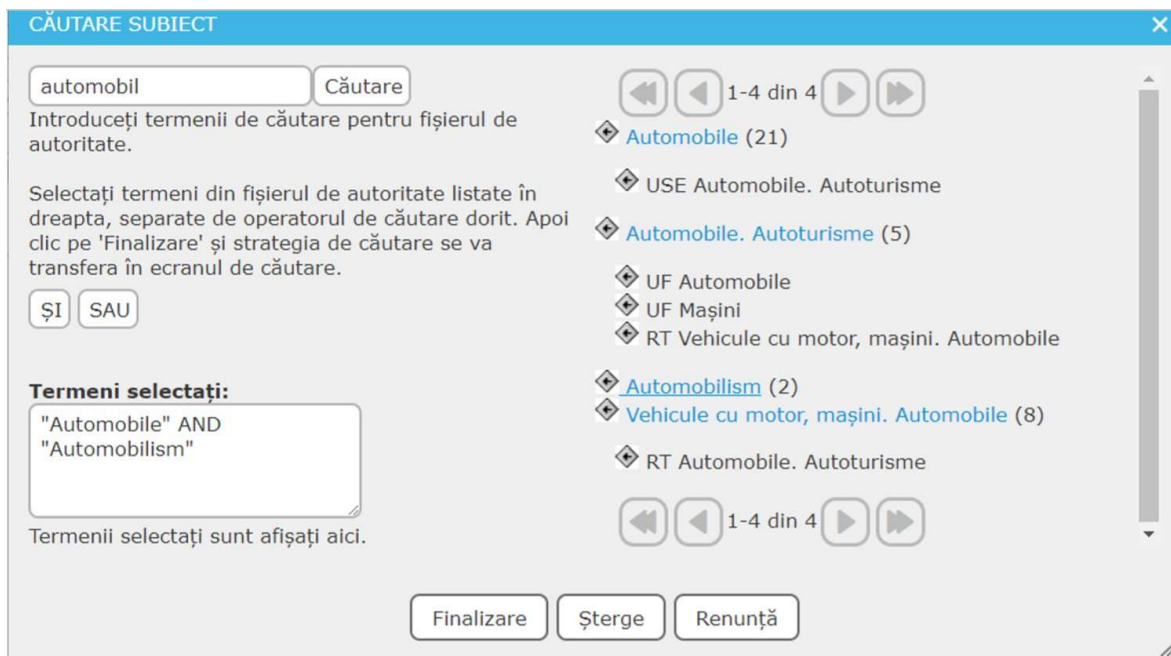

Collections (Colecții) This shows all locations where the library collections are housed.
