## SERGIU DUCA CENTER SYMPOSIUM

### Dear Colleagues,

We invite you to attend the second edition of the Sergiu Duca Symposium, an EFS endorsed event, that will focus on gastric surgery, and will combine 2 days full of interactive discussions on the topic with a hands-on course dedicated to minimally invasive gastric resections.

The goal of this edition is to reunite specialists in upper gastrointestinal surgery, oncology, gastroenterology, and intensive care in order to create a multidisciplinary panel that discusses and analyses current guidelines, surgical techniques, complication management and progress in the field of gastric diseases. We invite you to join us in a journey dedicated to the advancements in the multidisciplinary treatment of gastric pathologies.
